GENERAL INFORMATION

ACOP 2006 Spring CME Conference

April 21-23, 2006 • *Pointe Hilton Squaw Peak Resort* • Phoenix, AZ

Education Mission Statement

The ACOP's Continuing Medical Education (CME) is designed to meet the objectives and purposes of the College and the needs of the membership.

An objective of the ACOP is "to foster measures and conduct activities to increase the effectiveness of the specialty of pediatrics and pediatric education at all levels." The ACOP Committee on CME has as its main function the implementation of programs that will improve the quality of health care for children. Through surveys of its members during the year and at the CME Meeting, educational needs are identified. The scope of pediatric topics presented in the CME programs is based on these surveys.

Accreditation and Designation

The American College of Osteopathic Pediatricians designates this educational activity for a maximum of 15.5 credits in Category 1 credit towards the AMA Physicians Recognition Award. Each physician should claim only those credits that he/she actually spent in the educational activity.

This program anticipates being approved for up to 16.5 AOA Category 1-A CME credit pending approval by the AOA CCME. The ACOP is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Please contact ACOP at 877-231-ACOP with questions regarding this conference. Registration can be made online at www.acoped.org, by fax at 804-282-0090 or by mail using the form provided. Registration will NOT be taken over the phone. Class participants are required to be in class on time and may not be allowed into class 10 minutes after starting time.

Americans with Disabilities Act

The American College of Osteopathic Pediatricians has fully complied with the legal requirements of the ADA and the rules and regulations thereof. If any participant in this educational activity is in need of special accommodations, please contact ACOP headquarters at 1-877-231-ACOP.

Resort Information

The Pointe Hilton Resort at Squaw Peak is located in the foothills of Squaw Peak and the Squaw Peak Desert Mountain Preserve, on the northern edge of Phoenix, Arizona. The expansive

grounds of the resort include the all-suites accommodations of the main buildings, along with over 100 one- and two-bedroom casitas.

The facilities include the Hole-in-the-Wall River Ranch, a true desert oasis. This nine-acre recreation complex includes pools, spas, waterfalls, waterslides, and the "Lazy River", an endless meandering stream to carry floating tubers throughout the site.

The Tocasierra Spa and Fitness Center offers beauty & body treatments, massage therapy, and a full range of cardiovascular equipment and aerobic and weight facilities. The adjacent tennis facilities offer fully lighted courts for play whenever it may be convenient. Hiking in the desert mountain reserve and horseback riding are also easy ways to experience the splendor of the high desert.

For the kids, the resort's Coyote Camp provides supervised children's activities and programs.

The three restaurants at the resort provide a wide array of choices to complement the outstanding restaurants in the greater Phoenix and Scottsdale area.

Speaker Objectives

Friday, April 21, 2006

IBS vs. Chronic Abdominal Pain

Gary Silber, MD

1. The participant will be able to define the differential diagnosis of abdominal pain.
2. The participant will be able to differentiate and improve treatment plans for irritable bowel, and chronic abdominal pain.
3. The participant will be able to offer improved anticipatory guidance to parents whose children suffer with abdominal pain.

GI Update: Constipation and Reflux

Gary Silber, MD

1. The participant will be updated on the current clinical definitions for constipation and reflux.
2. The participant will be more aware of the diagnostic techniques to confirm GI issues.
3. The participant will be updated on the current treatment modalities of constipation and reflux.

Adolescent Eating Disorders & Weight Management Programs

Eric Hegybeli, DO

1. The participant will understand how different weight management programs are set up and managed.
2. The participant will have a working knowledge of the limitations of weight management programs.
3. The participant will have an improved understanding of the unique social stigmas associated with weight management programs.

Pediatric Surgical Emergencies: "Rush to Cut"

Stewart Lacey, MD

1. The participant will be able to recognize different aspects to surgical emergencies.
2. The participant will be better prepared to manage surgical emergencies.
3. The participant will be able to organize their offices to manage surgical emergencies.

Speaker Objectives

Poison Control in Pediatrics

Karen Scharlett, DO

1. The participant will be able to identify different poisonous compounds common to pediatrics.
2. The participant will be able to provide to the patients and families improved written anticipatory guidance on pediatric poisons.
3. The participant should be better prepared to manage pediatric poisonings.

Saturday, April 22, 2006

“TB to Be, or Not TB”

Scott A. Ostdiek, MD

1. The participant will be able to identify the changing aspects of TB in the U.S.
2. The participant will be exposed to the changing resistance patterns of TB.
3. The participant will be able to treat TB appropriate to region and risk.

International Adoption Issues

Stanley E. Grogg, DO, FACOP

1. The participant will be able to address time, money, and cultural issues.
2. The participant will be able to address infectious disease issues.
3. The participant will be able to address fear issues for the child, as well as, the adoptive family.

Pediatrics and the Law

Patricia A. McCoy, Esq.

1. The participant will be able to recognize the key pitfalls of malpractice litigation.
2. The participant will be able to interact better with patients and their families to diminish the probability of malpractice litigation.
3. The participant should be able to increase the probability of successfully defending a malpractice suit.

School Safety Issue: Are Our Kids Safe at School?

Frenche Colbert, JD

1. The participant will be exposed to the safety challenges in the school system.
2. The participant will be better able to provide anticipatory guidance for parents and children attending school.
3. The participant will be better able to effectively treat/address challenging issues associated with school safety.

Pediatric Neurosurgical Issues

Francesco T. Mangano, DO

1. The participant will be more knowledgeable to the different neurosurgical issues facing pediatrics.

2. The participant will be able to improve their recognition of neurosurgical issues facing children.
3. The participant will increase their knowledge on stabilization and management of neurosurgical issues until appropriate referral is completed.

Working with Parents to Motivate and Encourage Family Diversity

Ruth Kavalhuna, MS

1. The participant will be able to identify ways to motivate parents of non-traditional families.
2. The participant will be able to identify the relative benefits of encouragement and demonstrate methods to patients and families.
3. The participant will be able to easily employ these techniques in their daily practice.

Sunday, April 23, 2006

ADHD and Co-morbidities

Joseph L. Lillo, DO, PC

1. The participant will have an improved understanding for the range of normal behavior and development.
2. The participant will gain insight into the possible diagnosis and treatment options for those with delays and aberrant behavior.
3. The participant will take away techniques that can help parents of children with these diagnoses.

Pediatric Behavior and Development: When Things Go Wrong

James E. Campbell, MD, PLLC

1. The participant will have a sharpened understanding of the normal boundaries to childhood behavior and development.
2. The participant will gain insight into the diagnosis and treatment options for children with behavior issues.
3. The participant should be able to identify techniques that can help parents of children with behavior issues.

Diagnosing Autism: How Early Can It Be Done?

Randall K. Ricardi, DO

1. The participant will be able to better recognize characteristics of autism.
2. The participant will be able to improve early diagnosis of autism.
3. The participant will be able to implement a coordinated therapeutic treatment plan for the autistic patient.

Depression and the Black Box Warning

Robin Krause Blitz, MD, FAAP

1. The participant will be able to improve their assessment of childhood depression.
2. The participant will be able identify limitations to treatments because of FDA warnings and determine a variety of patient and family treatment modalities.
3. The participant will be able to differentiate between mental health disorders and improve referral resources.
